

C Topics

C Intro

Getting Started with C

C Program

C Comments

C Fundamentals

C Variables, Constants Literal

C Data Types

C I/O

C Programming Operators

C Flow Control

C if else Statement

C for Loop

C while and do while Loop

C break and continue

C switch Statement

C goto Statement

C Functions

C Functions

C User defined functions

Types of User-defined function in C

C Recursion

C Storage Class

C Arrays

C Arrays

C Multidimensional Arrays

Pass Array to a function in C

C Pointers

C Pointers

Relation between Arrays and Pointers

C Pass Addresses and Pointers

C Dynamic Memory Allocations

C Array and Pointer Examples

C Strings

C Programming Strings

String Manipulations in C Programming Using Library Functions

String Examples in C Programming

C Structure and Union

- C struct
- C struct and Pointers
- C struct and functions
- C Unions

C Files

- C File Handling
- C File Examples

C Additional Topics

- C Keywords and identifiers
- C Precedence and Associativity of Operators
- C Bitwise Operators
- C Preprocessor and Macros
- C Standard Library and functions
- C enums

C++ intro

C++ intro

C++

C++ Comments

C++ Fundamentals

C++ Keywords

C++ Identifier

C++ Variables

C++ Literals

C++ Constants

C++ Data Types

C++ Type Modifiers

C++ Constants

C++ Basic I/O

C++ Operators

C++ Flow Control

C++ Relational Operators

C++ Logical Operators

C++ if, if-else

C++ For Loop

C++ While

C++ Do while

C++ Continue

C++ goto statement

C++ Switch Case

C++ Ternary Operator

C++ Function

C++ Functions

C++ User defined Functions

C++ Function Overloading

C++ Inline Functions

C++ Recursions

C++ Arrays and String

C++ Arrays

Passing Array to a Function in C++

C++ Multidimensional Arrays

C++ String

C++ String Class

C++ Pointers and Ref

- C++ Pointer
- C++ Pointer and Array
- C++ References
- C++ Call by References : Using Pointer
- C++ Memory Management : new and delete

C++ Struct and Enum

- C++ Structures
- C++ Structures and Functions
- C++ Enumerations

C++ OOPs

- C++ Classes and Objects
- C++ Constructors
- C++ Constructors Overloading
- C++ Destructors
- C++ Access Modifiers
- C++ Encapsulations
- C++ Friend Function and Friend Classes

C++ Interitance and Polymorishm

- C++ Inheritance
- C++ Pubic,Private, Protected
- C++ Multiple, Multi Level and Hirarchial Inheritance
- C++ Function Overriding
- C++ Virtual Functions
- C++ Abstract Class and Pure Virutal Function

C++ STL : List, Vector, Queue and Stack

- C++ STL
- C++ STL Containers
- C++ std::array
- C++ vector
- C++ List
- C++ Forward List
- C++ Queue
- C++ Deque
- C++ Priority Queue
- C++ Stack

C++ STL : Map and Set

- C++ Map
- C++ Set

- C++ Multimap
- C++ Multiset
- C++ Unordered Map
- C++ Unordered Set
- C++ Unordered Multiset
- C++ Unordered Multimap

C++ STL : Iterators and algorithm

- C++ Iterators
- C++ Algorithm
- C++ Functors

C++ Advanced Topics

- C++ Exception Handling
- C++ File Handling
- C++ Ranged for Loop
- C++ Nested Loop
- C++ Function Template
- C++ Class Temmplte
- C++ Type Conversion
- C++ Type Conversion Operators
- C++ Operators Overloading

C++ Advanced Topics

- C++11
- C++ Lambda
- C++ Namespace
- C++ Preprocessor and Macors
- C++ Storage Class
- C++ Assert
- C++ Buffers
- C++ istream
- C++ ostream
